This academic source provides the lecture content template for a "New Age Life Skills" course (RU-100-17-0002) intended for first-semester B.TECH students at Rungta International Skills University. The lecture material focuses heavily on fundamental digital literacy, specifically covering Internet Basics and Email communication. Key concepts explained include the difference between the Internet versus the World Wide Web, the functions and features of a Web Browser, and the structure and components of Electronic Mail (Email). The content also addresses practical application, detailing the setup and features of Microsoft Outlook and emphasizing critical Internet and Email Safety Tips, reinforced by a case study about a fictional IT company.
