Identify Phishing Attempts

Learn how to recognize and protect yourself from phishing attacks through digital messages.

⚠️ **Aim:** To identify phishing attempts through digital messages.

Steps to Identify Phishing

Read the Message Carefully
Check for spelling errors, urgent demands, or unfamiliar senders.

Check the Links
Hover over links to see the full URL and verify if they lead to legitimate websites.

Watch for Red Flags
Too-good-to-be-true offers, requests for sensitive in information, or generic greetings.

Verify the Sender
Confirm the sender's email address by contacting them through a different method.

How Does a Phishing Attack Work?

Hacker ① → ② **Phishing Website** ③ → **Target**

Hacker
Hacker sends phishing email

Phishing Website
Victim clicks on phishing link and visits fake website

Target
